

## Urethane; Polyurethane: Solventbase Solution Polymer

**QA4849**

---

### **PRODUCT DESCRIPTION**

---

**QA4849** is a general purpose adhesive. It has excellent adhesion to a wide variety of substrates. These products are used as base adhesives for bonding leather, fabric, plasticized vinyl, rubber and thermoplastic rubbers such as Kraton. Plasticizers can be added to increase flexibility

### **APPLICATIONS**

---

- PVC Laminating
- Base for general purpose adhesives

### **TECHNICAL INFORMATION:**

% Solids	25 ± 1%
Viscosity, @ 25°C	3,000-6,000 cps
Wt./Gal	7.43 lbs

### **Typical Properties:**

Chemical Type	Aromatic Polyester
Solvent System	MEK/Toluene 1:1
Tensile <sup>1</sup>	2648 psi
Elongation <sup>1</sup>	495%

### **TEST METHODS**

% Solids - D-2369  
Viscosity - D-2196  
Tensile - D-41  
Wt/Gal - D-1475  
Elongation - D-412

<sup>1</sup>Instron tester; films pulled at 2 inches per minute
