

80 HS

Technical Data

Premium Superabsorbent Polymer

Typical Properties:

Particle Size Distribution (μm)	0 - 100
Absorption Capacity (g/g deionized water)	> 250
Bulk Density (g/l)	400 - 800
Moisture (%)	< 7

Chemistry:	Sodium Acrylate polymer
Appearance:	White powder
Storage:	One year in closed containers/bags stored in dry conditions
Packaging:	Multi-wall bags and supersacks

Technical information is based on current knowledge and is offered to inform and advise subject to your further investigation and verification. Modifications may be made in the interest of technical improvement. No warranties are expressed or implied as the use of the product is beyond our control.
